

GV7433

Key Attributes:

- Full Season Bi-Color Super Sweet Hybrid
- Strong Emergence
- Excellent stalk strength for good lodging resistance
- Consistent High Yield and Recovery across multiple environments and conditions
- Resistant to Common Rust

Maturity:

- 1190 heat units to 1st silk
- 1810 heat units to harvest
- 82 - day maturity

Eat Traits:

- Ear length of 7.5" -8"
- Ear diameter of 2.1"
- 16 – 20 kernel row

Kernel Type:

- Bi-Color Super Sweet
- Moderate tenderness
- Good sweetness and flavor

Harvest:

- Plant height of 88"
- Ear set height of 25"
- Strong field yields
- High recovery
- Husks well

Disease Resistance:

- Common rust resistance, contains the RpGI gene
- Moderate Tolerance to NCLB

Description:

GV7433 is a robust Bi-Color Super-Sweet Hybrid that consistently yields and recovers very well across a wide range of environmental conditions; GV7433 also demonstrates good emergence and early vigor for a super-sweet. The variety has also been noted for its ability to stand well during heavy winds. GV7433 possesses an excellent rust disease package containing the RpGI rust resistance gene and has moderate tolerance to NCLB.
